Azure Cache for Redis

Microsoft Azure Cache for Redis brings a critical low-latency and high-throughput data storage solution to modern applications. This can help improve the performance and scalability of your apps that rely heavily on backend data stores.

Learning objectives

By the end of this module, you'll be able to:

- Evaluate whether Azure Cache for Redis can improve the performance and scalability of your apps.
- Describe how to use Redis as a distributed data or content cache, a session store, a message broker, and more.

[Start >](#)[⊕ Add](#)

Prerequisites

- Good working experience with Azure.
- Good working experience with DBaaS platforms.
